HOW IT ALL BEGAN

SGB MILESTONES

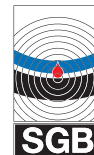

First leak detectors for tanks with a leak protection lining: VL N1, VSH

1967

1962

Invention of full-vacuumetric leakage monitoring | SGB Sicherungsgerätebau is founded by Dr. Fritz und Ilse Berg

First leak detector for double-walled pipes: VL-Hfw2 | First pressure leak detectors for tanks | First leak detectors for flat bottom tanks

1976

Jost Berg, son of the company's founder, takes over the management | The 200,000th leak detector is produced

1990

1997

First explosion-protected vacuum leak detector VL-H9

Invention of ELC: pressure leak detectors for several underground tanks for BP | First leak detectors for double-walled hoses

1999

DIN EN ISO 9001

First electronically operating leak detector: with new plastic housing, integrated leak calculation, digital pressure display and „real“ three-way valves in pressure and measuring lines

2002

VIMS monitors double-walled underground tanks and pipes with a conveying pressure of up to 6 bar – especially made for mineral oil products

2009

2010

LDU: the first solution on a pressure basis for monitoring both tanks and pipes used at petrol stations

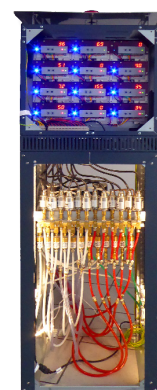

SGB International – SGB's company for global trading outside Europe is founded

2015

VLXE-SAB T/P especially made for monitoring several tanks and pipes at petrol stations | LD VIP: especially made for LNG pipes

2017

Improved weather-proof housing – made of stainless steel, IP 66

2018

Launch of B2B webshop | First electronic leak detector for Ex areas

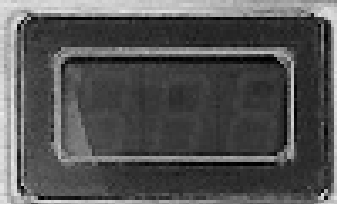

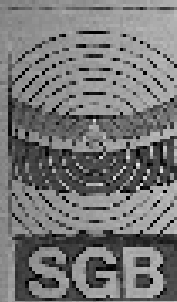

2020

SHOP.SGB.DE

2022

Staff of 45, turnover of > 7 m €
